

IN THE CLAIMS

Claim 1 (canceled).

Claim 2 (currently amended): ~~[[The]]~~ A gas container ~~according to claim 1~~ **including:**
a bag defining a space for storing gas and an aperture for passing the gas;
a mouth including a first end for connection with a valve and a second end inserted
in the aperture; and
a connector located between the bag and the second end of the mouth, wherein the bag includes a lining of polypropylene, and the mouth is made of polyoxymethylene, and the connector is made of polyamide so that the lining of the bag, the second end of the mouth and the connector are bounded together firmly when they are ~~subject~~ **subjected** to heat pressing.

Claim 3 (currently amended): ~~[[The]]~~ A gas container ~~according to claim 1~~ **including:**
a bag defining a space for storing gas and an aperture for passing the gas;
a mouth including a first end for connection with a valve and a second end inserted
in the aperture; and
a connector located between the bag and the second end of the mouth, wherein the mouth includes a plurality of protrusions formed on the second end.

Claim 4 (currently amended): The gas container according to claim ~~[[1]]~~ **3** wherein the protrusions are annular ribs.

Claim 5 (currently amended): The gas container according to claim ~~[[1]]~~ **4** wherein the bag includes a first layer of polyethylene terephthalate.

Claim 6 (original): The gas container according to claim 5 wherein the bag includes a second layer of aluminum attached to an internal side of the first layer.

Claim 7 (currently amended): ~~[[The]]~~ A gas container ~~according~~ **including:**
a bag defining a space for storing gas and an aperture for passing the gas;
a mouth including a first end for connection with a valve and a second end inserted
in the aperture; and
a connector located between the bag and the second end of the mouth, wherein the bag includes a first layer of polyethylene terephthalate, wherein the bag includes a second layer of aluminum attached to ~~claim-6~~ **an internal side of the first layer,** wherein the bag includes a third layer of polyamide and attached to an internal side of the second layer.

Claim 8 (original): The gas container according to claim 7 wherein the bag includes a fourth layer of polypropylene attached to an internal side of the third layer.

Claim 9 (currently amended): A gas container including:

[[●]] a bag defining a space for storing gas and an aperture for passing of the gas, the bag including a lining of polyamide; and

[[●]] a mouth including a first end for connection with a valve and a second end inserted in the aperture, the mouth being made of polyoxymethylene so that the lining of the bag and the second end of the mouth are bounded together firmly when they are ~~subject~~ subjected to heat pressing.

Claim 10 (original): The gas container according to claim 9 wherein the mouth includes a plurality of protrusions formed on the second end.

Claim 11 (original): The gas container according to claim 10 wherein the protrusions are annular ribs.

Claim 12 (original): The gas container according to claim 9 wherein the bag includes a layer of polypropylene and attached to an external side of the lining.

Claim 13 (original): The gas container according to claim 12 wherein the bag includes a layer of polyamide attached to an external side of the layer of polypropylene.

Claim 14 (original): The gas container according to claim 13 wherein the bag includes a layer of aluminum attached to an external side of the layer of polyamide.

Claim 15 (original): The gas container according to claim 14 wherein the bag includes a layer of polyethylene terephthalate attached to an external side of the layer of aluminum.

Claim 16 (new): The gas container according to claim 2 wherein the bag includes a first layer of polyethylene terephthalate.

Claim 17 (new): The gas container according to claim 16 wherein the bag includes a second layer of aluminum attached to an internal side of the first layer.

Claim 18 (new): The gas container according to claim 3 wherein the bag includes a first layer of polyethylene terephthalate.

Claim 19 (new): The gas container according to claim 18 wherein the bag includes a second layer of aluminum attached to an internal side of the first layer.
